February 2008

Greetings fellow modelers,

Our February meeting is fast approaching and we will have lots to discuss. This will be our first meeting without Our Prime Minister Peter Ferik. Peter is off somewhere in China with the babysitter. Hooray for Peter! (just kidding, there is no babysitter) You all know the place and time. Burbank VFW on February 2nd 2008. Coffee and donuts will be in attendance, but I do not know how long they will be hanging out, with our crowd probably not too long.

Ken Schwartz, the demonstration planner has advised me recently that I was the scheduled demonstrator for the upcoming meeting. I had no idea! You see, this is how you do business my friends, just put it out there and it shall be done. I guess I will do some sort of demo for all of you, but I am not quite sure what will be the best and most requested demo. I came up with the Idea that I will have you send me some E-Mails and give me some suggestions on what you have been wanting to see and or learn, we can do groundwork, painting with oils, wet box and acrylics, etc...etc.... etc. Please make the E-Mails simple and brief.

Our world-class raffle table will be gleaming with goodies yet again! Somebody out there in the modeling community is raging with raffle envy due to our clubs success with the quality and quantity of raffle items on display. He shall remain nameless but he is definitely shameless. Other clubs have scaled down due to the economy and have opted for the quality over quantity issue, but here at LAMS we say quantity and quality rules! Take that! GLC. I toll jou mann, don't F#@! Wit me, I bury dos caca-roaches!! (Al Pacino-Scarface)

I will be bringing my Camera and equipment, so bring in your projects. It does not matter whether they are completed or in progress. If you have noticed that the website has been down, It is only temporary. We are still working on the new format and we will be good to go real soon.

May the Schwartz be with you!

Antonio Montana
